PROFESSIONAL SUMMARY

Full-stack software developer with 2+ years of production experience building and maintaining web applications using TypeScript, JavaScript, Node.js, and Python. Experienced in backend development with Express, MySQL, MongoDB, and NoSQL databases, modern frontend frameworks including React, and cloud infrastructure using AWS, Docker, Redis, and Nginx. Proven ability to lead development teams, deliver automation platforms, and deploy machine learning inference services. Seeking a software engineering role to deliver efficient, scalable software solutions.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python

Frontend: React, Next.js, modern React frameworks

Backend: Node.js, Express, REST APIs, NoSQL

Databases: MySQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, Nginx, server management, deployment

Other: Machine learning, inference services, browser automation, Raspberry Pi, Websockets

EXPERIENCE

Head Developer Nov 2025 – Present

LRY Marketing

- Lead development and maintenance of LRY Marketing's internal systems including an automation platform and company hub website.
- Hosts and maintains 3 automated workflows covering database backup, email system automation, and browser automation, improving operational reliability and reducing manual intervention.
- Oversee development progress, coordinate with contributors, and ensure timely delivery of updates, bug fixes, and major issue resolutions.

Software Engineering Intern Jan 2026 – Mar 2026

Technological Institute of the Philippines — Manila CPE Department

- Completed development of the TIP Manila Computer Engineering Department's Online Repository for Project Design and On-the-Job Training Reports.
- Delivered a full-stack web application enabling faculty and students to submit, manage, and retrieve academic project documentation.
- Applied CI/CD principles for system deployment using Docker containers for containerization, Nginx as a reverse proxy, and Resend for transactional email delivery.

Software Developer Jun 2025 – Nov 2025

LRY Marketing

- Developed and maintained G-Unit Automation, a proprietary browser automation tool that simulates human interaction patterns to execute repeatable workflows.
- Actively serving at least 10 concurrent users, supporting small to medium business operations through automated browser session management and workflow orchestration.

Backend Developer Nov 2024 – Jul 2025

LRY Marketing

- Developed and maintained the backend of the LRY Marketing Hub Website, delivering 10 new API endpoints and supporting a team of 5 employees including direct collaboration with the company owner.
- Supported and maintained 2 company APIs, ensuring uptime and consistent integration across internal systems.

Software Engineering Intern (Volunteer) Jan 2024 – Mar 2024

Technological Institute of the Philippines — Manila CPE Department

- Architected the foundational system structure using a modified MERN stack with Next.js in place of React for server-side rendering, establishing the technical foundation later completed in 2026.
- Laid groundwork for a centralized academic document management system used by the department.

EDUCATION

Bachelor of Science in Computer Engineering 2022 – 2026

Technological Institute of the Philippines (TIP) — Manila | Expected Graduation: June 2026

PROJECTS

Palengk-E

Mobile application connecting local farmers with nearby consumers, enabling localized buying and selling of fresh produce. Focused on convenient, community-based commerce.

Project B.R.I.A.A

Contributed to the development of an indigenous drone system for the Armed Forces of the Philippines, applying advanced technologies in adherence to confidentiality requirements. Optimized total system response time from an initial 5 seconds down to 650–750ms, achieving over 85% reduction in latency. Implemented WebSocket communication for a continuous real-time inference service pipeline.

SEMINARS AND TRAINING

- TIP Manila CPE Symposium 2026 — Technological Institute of the Philippines — Manila, 2026
- Ideathon 2024 — Technological Institute of the Philippines — Manila, Jul 2024
- Unlocking the Power of Raspberry Pi — Technological Institute of the Philippines — Manila, Jul 2024
- Cyber Aware, Cyber Safe: Strengthening Our Digital Defenses — Technological Institute of the Philippines — Manila, Oct 2024
